+91 6383221062 Coimbatore

SUMMARY

Software Engineer skilled in Java, SQL, and full-stack development, with hands-on experience in Spring Boot, low-code platforms, and automation testing. Strong problem-solving abilities with expertise in Selenium, Postman, and performing functional, regression, and automation testing to ensure high-quality software delivery.

SKILLS

- **Languages**: Java, HTML, CSS
- **Testing Tools**: Selenium, JIRA, Postman, JUnit, TestNG
- **Testing Types**: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing,Performance Testing
- **Frameworks**: TestNG, JUnit
- **Databases**: SQL
- **Test Management**: Test Case Design, Bug Tracking, Defect Reporting, Agile Scrum
- **Others**: Low-Code Application Development, REST API Integration, Attention to Details ,Effective Communication Problem-Solving , Team Collaboration , Time Management

EDUCATION

SNS College of Technology *2021-2025*
B. E CSE 8.58 CGPA

Kadiri Mills Hr.Sec.School *2020-2021*
HSC 89%

Government High School *2018-2019*
SSLC 87%

EXPERIENCE

Automation Test Engineer| Akhira services Pvt Ltd *Aug 2025-Present*

- Conducted functional, regression, and retesting activities to ensure product quality and stability in Agile sprint cycles.
- Developed automation frameworks and created/executed test cases to improve testing efficiency and coverage.Collaborated with cross-functional teams to identify, report, and track defects, ensuring timely resolution and high-quality releases.

Quality Analyst | Atmecs *Feb-July 2025*

- Conducted comprehensive manual testing for web and mobile applications in the Airbnb project, ensuring optimal functionality and user experience.
- Reported and documented 100+ defects in JIRA, contributing to improved product stability and quality.

Low Code Trainee | Mahat Labs *Nov 2023*

- Developed an Apartment Management System using low-code tools, implementing modules for rent tracking and tenant management to accelerate delivery by 50%.

PROJECTS

- **AI HRM QA Project – Role: Automation Test Engineer**– Performed manual and automation testing for web and mobile platforms, creating/executing test cases and reporting 100+ defects using JIRA.
- **Airbnb QA Project – Role: QA Analyst –** Performed manual testing for web and mobile platforms, identifying and reporting 100+ defects using JIRA.
- **Gen AI-Based Healthcare Chatbot – Role: Backend Developer –** Developed using Python, NLP, Flask for symptom analysis and real-time health reports.
- **E-Commerce Website – Role: Individual Developer –** Built with Spring Boot, HTML, CSS, JavaScript, MySQL for online shopping with advanced search and filter.
- **Agriculture Web Application – Role: Team Lead –** Created using HTML, CSS, JavaScript, PHP, XAMPP for direct farmer-to-consumer marketplace, coordinating development and project delivery.

CERTIFICATIONS

- Java Programming, DSA in Java, HTML & CSS – PrepInsta
- Manual Testing, Automation Testing – Udemy
- Industry 4.0 and Industrial Internet of Things – NPTEL
- Cloud Practitioner – AWS
- Enterprise Design Thinking Co-Creator -IBM

ACTIVITIES

- **TN2025 StartSummit Participation –** Showcased the launch of the Complex AI HRM Product and explored international startups.
- **Paper Presentation –** Presented Gen AI Healthcare Chatbot at Adithiya Institute of Technology (National Conference).
- **IEEE Paper Published –** 2023 International Conference on Computer Communication and Informatics (Agriculture).
